The Poets of America; illustrated by one of her Painters. Edited by John Keese. New York. Samuel Colman: 12mo. pp. 284.

This very handsome volume has been much and justly commended. Most of the pieces which fill its pages are beautiful specimens of American poetry; and the illustrations, with a few exceptions, are well designed and executed; with some exceptions, we say, for there are two or three which are deplorably out of drawing. The mother and child, for instance, on page 175, which is meant to illustrate Lucretia Davidson's beautiful poem, called "The Smile of Innocence"; but it illustrates more the artist's total ignorance of the proportions of the infantile form.

The volume contains so many of the best pieces of our best poets, that it will not only answer for an elegant Christmas or New Year's present, but will have a permanent value, and much of it will be read with pleasure, long after most of the contents of other splendid annuals of the year are forgotten.

Revised Edition. By Warren Jenkins. Columbus: Isaac N. Whiting. 1839. 12mo. pp. 546.

It is impossible, without minute local information, to answer for the accuracy of a work of this kind. But, as far as we are able to form a judgment of its merit, it seems to us an extremely well composed and valuable manual. It belongs to a class of books deserving of all encouragement.

Picture of Early Life, or Sketches of Youth. By Mrs. Emma C. Embury. Boston: Marsh, Capen, Lyon, & Webb. 1839. pp. 310.

The little stories, which fill this volume, are told in such a simple and natural style, that we have, while reading them, a strong impression of their being taken from real life. Their tendency is, to inculcate feelings of humanity and principles of virtue; and they present many graphic scenes of the distresses to which the life of man is subjected in all the ranks of society. If we were inclined to find fault with the author for any thing, it would be for indulging too much in tales of sorrow, and thus drawing the picture of life in colors darker than the reality.

The author expressly disclaims all pretensions to literary elegance; still it is but justice to her to remark, that her style is singularly graceful and pure, and that she shows uncommon taste in adapting it precisely to whatever subject she is handling.

Morton's Hope, or the Memoirs of a Provincial. In 2 vols. New York: Harper & Brothers. 12mo.

Here is a work altogether unworthy of its author, whoever he may be. It bears abundant marks, on the one hand, of his possessing talent and culture, and, on the other, of his having been at no pains to give the public the fair benefit of his capacities. The notion in his mind seems to have been like nothing more than that of another Vivian Grey ; but this he has slurred and burlesqued to the very extreme verge of German license. Many a scene reads as if it had been thrown off at a venture, and sent to the press, because the compositor was waiting. The plot is all as lame and dislocated as need be. About the end of the first quarter of the first volume, for instance, the hero tells of the hopes and disappointment of an early love. "She took a slight ring from her finger, and we broke it between us. She tied my fragment to a tress of her hair, and hung it round my neck. She kissed me fondly, and promised to be mine for ever. That raven braid, — that broken ring, — lie now before my eyes. They are all that remind me of thy plighted love, Mayflower." This is cruelly pathetic, no doubt ; but the reader's distress is soothed, when he finds, at the end of the second volume, that, at the time of writing it, the hero was the happy lord of this perfidious Mayflower. It is plain, that the author has been at the German schools, and he appears to have there imbibed an admiration for very bad models, and especially a toleration for the habit of that class of

writers, not without credit in some quarters, in these whimsical days, who, when they put pen to paper, *run for luck*, throwing on their readers the responsibility of making a meaning for what is not significant, or reconciling contradictions in what is. The autobiography of Colonel Waldron is in no wise redeemed from being unspeakably tiresome, by its large share of raw-head-and-bloody-bones adventures; and his whole character is a mere monstrosity, yet scarcely more so than those of his son and daughter-in-law. The episode of the hero's intrigue with an actress at Prague, with his essay at a bandit's life, make another most lugubrious piece of business. As to such matters as attention to proprieties of time and place, lizards are made to "shoot to and fro in the patches of sun-light," (Vol. I. p. 25,) in the description of a place within ten miles of Boston, in which region, though it is true the animal has been seen, its shape is about as much known, from actual observation, as that of the rhinoceros. "The Connecticut River" of Vol. I. page 244, is not "the Connecticut" of page 250. It is the Mohawk, if we understand the matter rightly (p. 253.); and along its banks the hero's progress is obstructed by "cane-brakes," (p. 249,) some degrees of latitude north of where any other observer has met with them. It was the laying of "exorbitant taxes" by the mother country, that brought on the opposition of the New England people; and, in a description of the "Boston Massacre," that transaction is represented to have taken place at high noon, in opposition to the homely authority of that popular engraving, in which the moon over the old Brick Church makes so conspicuous an object. As to the sketches of foreign manners, we have but to hope, that they are no more correct than they are entertaining. If otherwise, the more is the pity. Yet one thing helps to account for another; and if the German youth are really reared at the universities in such an atmosphere of beer, smoke, and blood, there is less occasion to be surprised at the figure which so many of them make, when, a few years later, they emerge as writers upon matters of theology, philosophy, and art.

After all, no one can read "Morton's Hope," without perceiving it to have been written by a person of uncommon resources of mind and scholarship. But this writing *ad libitum* will never do. It is simply deplorable and vexatious, that one so evidently qualified to do exceedingly good things, should, in this instance, have done a thing so exceedingly poor.

This volume, in the costly and tasteful style of its mechanical execution, takes rank with the New Year's Gift-Books, though this purpose is not announced. It is chiefly composed of short pieces upon moral and devotional subjects. We certainly cannot undertake to commend them as being in a high style of poetry. But they have an easy flow of versification, and the tone of feeling which pervades them is so excellent, — so sincere, so fervent, delicate, charitable, and modest, — that we have been led on, from page to page, through the greater part of the volume, and have derived from it more pleasure than we have often owed to works of much higher pretension.

Society, Manners, and Politics in the United States; being a Series of Letters on North America. By Michael Chevalier. Translated from the Third Paris Edition, by T. G. Bradford. Boston: Weeks, Jordan, & Co. 1839. pp. 467.

Mr. Bradford has executed his task in a very faithful and able manner. He has translated the valuable work of M. Chevalier into fluent and elegant English, omitting only a few passages, which have no interest in this country. In some cases he has substituted, in the statistical statements, the results of information obtained since Chevalier's book was written, for those that are given in the French, and thus added not a little to its value as an authoritative work in the United States. The manner in which the work has been presented to the public, in respect both to literary and typographical execution, is deserving of the highest praise.
